

# **FACTUMSOFT ERP EXTENDED PROFILE**

## OVERVIEW

Factumsoft ERP is a made-to-order ERP platform suitable for all-size businesses. The ERP can be hosted via the cloud or installed on-premise.

Factumsoft makes bespoke ERP solutions designed in consultation with the company. As well as all core ERP features, the platform can include CRM, legal management, and HRMS functions. Specialist functions are available for healthcare companies, such as patient management. At the same time, retailers can benefit from inventory and manufacturing process management.

Factumsoft ERP can be developed to integrate with third-party software systems, allowing the platform to integrate with the company’s existing software processes. The ERP continues to adapt after implementation with machine learning, this is achieved by collecting data about user behavior and patterns in processed data to help with the development of the platform.

The Factumsoft team offers support through implementation and beyond. The company provides a tailor-made plan to help teams transition to the new ERP system. They also offer a post-implementation team, which includes a business analyst, account manager, a quality assurance support lead, a software development lead, and an IT lead.
