

ORION ENTERPRISE

EXTENDED PROFILE

OVERVIEW

Orion ERP is suitable for companies looking to manage their financial planning, project management, sales, procurement and contracting in a single software solution. Orion ERP aims to help organizations improve the efficiency of their decision making while garnering a more in-depth understanding of their processes and workflows.

One of Orion Enterprise software's key features is its manufacturing module, which allows users to closely manage the production cycle and analyze their organizations bill of materials, lifecycle costs and waste. The sales management module provides a salesman console allowing employees and supervisors to track targets, plot demand and manage customer data.

Orion Enterprise is offered as an on-premise and cloud-based solution. The software is compatible with Android and iOS devices.
