ERPFOCUS

BATCHMASTER ERP EXTENDED PROFILE

BATCHMASTER
Process Manufacturing Software

OVERVIEW

BatchMaster ERP is a process manufacturing software for formula-based, process manufacturers in the food and beverage, chemical, nutraceutical, pharmaceutical and life sciences, personal care, paints and coatings, hemp, CBD, and cannabis industries, where production runs to a recipe or formula rather than a bill of materials.

Batchmaster covers the full process manufacturing workflow, namely:

- Formulation and version control
- Packaging management
- Inventory with lot-level tracking and potency tracking where required
- Batch production
- Quality control and quality assurance
- Costing
- Lot traceability and recall
- Industry-specific compliance and labeling
- MRP planning
- MPS scheduling
- Mobile warehousing.

For regulated verticals, that can include bi-directional lot traceability with one-click recall searches, electronic batch tickets and master batch records, potency-based inventory that adjusts inputs for active strength, FDA nutrition panels, supplement facts, GHS/SDS documents, and 21 CFR Part 11 support for electronic records and signatures.

DEPLOYMENT OPTIONS

One option is an add-on process manufacturing application that runs alongside an existing financial system. Notable supported systems include QuickBooks, Sage 100 and 300, Microsoft Dynamics 365, and SAP Business One.

BatchMaster Software is an SAP OEM partner with manufacturing embedded into the platform rather than connected only through a separate interface. This gives formula-based manufacturers deeper functionality for formulation, quality, compliance, and traceability without replacing their accounting system.

For those looking to upgrade to an end-to-end ERP or replace their current ERP, BatchMaster ERP is also available as an end-to-end, industry-specific system covering financials, sales, purchasing, supply chain, customer service, and CRM alongside the process-manufacturing suite. There is a cloud-native SME edition for growing producers and an enterprise edition built on SAP Business One for larger operations with more complex requirements.

BatchMaster can run on a local server, in the cloud, or in a dedicated private cloud environment, with monthly subscription options available.

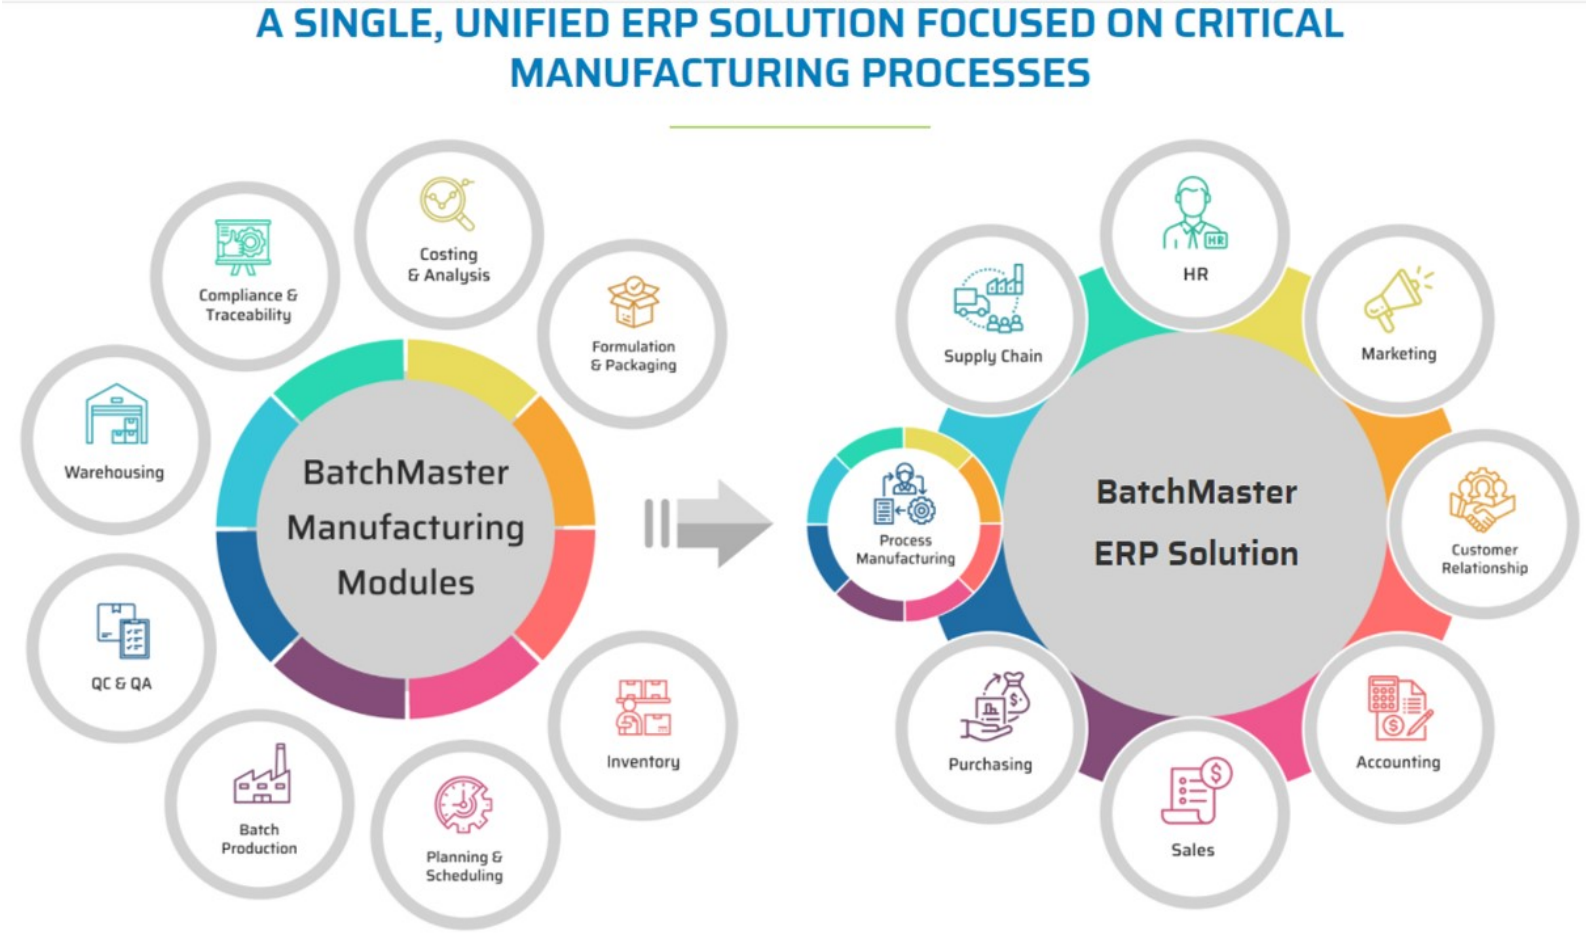
SOFTWARE SCREENSHOTS



INNOVATIVE TOOLS TO EFFECTIVELY MANAGE YOUR GROWING BUSINESS

Google Type Search
Find related records rapidly

Relationship Mapping
View all record connections

Multilevel Workflows
Speed Management Approvals

Mobile App
Gain Visibility & Control, Anytime, Anywhere

Data Collaboration
Share data via channels upon events

Alert Management
React to desktop, email and text alerts

Role Based Dashboards
Make more informed decisions, faster

Templates & Libraries
Employ preconfigured industry specific data

TAKE ADVANTAGE OF LEADING EDGE TECHNOLOGIES

BatchMaster Software offers deployment and platform solutions that suit your specific needs.

Cloud

Deploy BatchMaster in the cloud to recognize quicker time to value and a lower cost of ownership. Take advantage of our 'Private Cloud' environment.

Mobile

Manage your business from anywhere, at any time, on any device. Execute and validate warehousing and production tasks on the plant floor.

On-Premise

Deploy BatchMaster on your local server. Let our technical staff help your IT staff ensure the system will support your anticipated growth

AN END TO END PROCESS MANUFACTURING ERP SOLUTION

BatchMaster ERP is an affordable, easy-to-use, complete ERP solution specifically designed for the process industries, including food, beverage, chemicals, nutraceuticals and pharmaceuticals.

By incorporating all your business functions, our SAP Business One process manufacturing solution supports sales, purchasing, inventory, financials, product development, manufacturing, distribution.

BatchMaster ERP enables your staff to

- See a real-time, unified view of your business KPIs
- Bring products to market quickly and cost-effectively
- Ensure the production of high quality products
- Comply with industry specific regulatory mandates
- Optimize cash flow for business needs
- Operate globally with multi-plant, multi-division and multi-currency support
- Meet your customer commitments
