

DATACOR ERP

EXTENDED PROFILE

OVERVIEW

Datacor ERP is a product offered by New Jersey-based software company Datacor. Since 1981 Datacor has offered a range of software, consultancy, and hardware options to the process/formula-based manufacturing and chemical distribution industries.

Datacor ERP allows users access to customers, products, suppliers, and key business metrics from a single data dashboard. This allows instant access to information and transactions with linked panels, multiple active windows, and MS Outlook integration including email, context menus, online multi-level queries, calendars, and enhanced search capabilities.

There are also specific features for process manufacturers such as regulatory compliance, tracking, and scheduling tools, and for chemical distributors such as flexible packaging and pricing options.
