# EXTENDED PROFILE

## OVERVIEW

HarrisData ERP is a software solution aimed at medium-sized manufacturing organizations.

The package is suitable for companies looking for a simple to install, easy-to-use ERP solution that incorporates finance, distribution, and manufacturing. It is designed to accelerate a firm's time to value and lower the total cost of ownership of its products and processes.

Alongside intuitive inventory management and shop floor activity tracker is a powerful accounting module that manages general ledger, payables, and receivables. An additional HR module handles employee benefits, payroll, and attendances.

HarrisData offers its ERP software as a SaaS solution. While it is primarily a web-based, cloud-hosted solution, the firm will also install the ERP software on-premise on request. It is accessible via any desktop or mobile device with web browsing capabilities.
