

TOTVS DATASUL EXTENDED PROFILE

OVERVIEW

Datasul originated as an independent ERP built specifically for industrial environments in southern Brazil, with a heritage dating to 1986.

TOTVS acquired Datasul in 2008 and added it to the ERP portfolio. It remains the go-to option for complex manufacturing environments that require rigorous production control, MRP, and cost management (particularly where standardised processes and governance take precedence over flexibility).

Datasul's standardised process model suits industrial businesses that benefit from strong operational governance. Its foreign trade module (which covers imports, exports, drawback, and currency exchange) is more developed than what [Protheus](#) offers out of the box, a point to consider for manufacturers with international supply chains.

CORE FUNCTIONALITY

SOFTWARE SCREENSHOTS

The screenshot displays the 'Tribut Configurator' application interface. The top navigation bar includes the 'TOTVS' logo and several system status indicators. A dark sidebar on the left contains a search bar and a menu with options: 'Tax Scenario', 'Tax Territory', 'Taxes', 'Tribute Formula', 'Tax Class', and 'More'. The main content area is titled 'TAX CONFIGURATOR' and 'Tax Scenario'. It features two buttons: '+ Gulada Inclusion' and 'New Tax Scenario'. A search bar with the placeholder 'Look for' and an 'Advanced search' link is also present. Below this is a table with the following data:
