

**EFACS E/8**

**EXTENDED PROFILE**

## OVERVIEW

EFACS E/8, from Exel Computer Systems, is an ERP system with a component structure, this allows the system to be customized to the requirements of the company.

The ERP can be applied to several manufacturing methodologies, including engineered-to-order, assemble-to-order, and made-to-stock.

EFACS E/8 is split into 6 components; product definition, material management, planning, CRM, aftermarket, and accounts. Each component is responsible for streamlining a different company process, each one can communicate directly with other EFACS E/8 components and third party systems via industry standard protocols.

Users of EFACS E/8 ERP will benefit from system-wide features such as document management, multi-language, and currency capabilities as well as a touchscreen interface and process automation.

EFACS E/8 can be hosted on cloud servers or at the user's premises, the system is browser based and so can be accessed via any desktop or via Android and iOS apps.
