

SALESORDER.COM

EXTENDED PROFILE

OVERVIEW

salesorder.com is a cloud-based inventory and order management solution designed specifically for distributors, wholesalers, and e-commerce businesses. Popular with companies looking to upgrade from QuickBooks or find a less-costly alternative to Netsuite, salesorder.com aims to provide an alternative to 'Frankenstein' inventory and order management software by providing a fully integrated solution with strong order management and accounting functionalities.

salesorder.com is designed to scale with your business, so offers tax-agnostic multi-currency accounting with real-time cash flow visibility. The software offers adaptable automated workflows for any order management model and is highly customizable - users can perform many adjustments with a single mouse click.

The CRM module with salesorder.com can be integrated with Gmail, Outlook and other IMAP-compatible email providers, whilst order management functionalities integrate with a wide range of online marketplaces, including Amazon, eBay, Etsy, Alibaba, and Walmart Marketplace.

salesorder.com is cloud-based, and so can be accessed on any device with an internet browser installed - though, for mobile access, iOS and Android tablets work best. Implementation typically takes four to five weeks, with training, customization, and implementation support services also offered.
