

# GENIALCLOUD PROJ

# EXTENDED PROFILE

## OVERVIEW

Avantune's Genialcloud Proj ERP is a cloud-based platform that offers many apps that can manage business processes, allowing users to customize the software to the needs of their business.

The initial start-up and small business solution, called Social, offers free access to two users with access to Genialcloud Proj. The different levels of Genialcloud Proj depend on the number of users and the level of support you would want. As well as apps covering standard ERP features like BI and inventory, the professional suite can be extended with functionality such as CRM, SCM, and HRM.

It also includes document management and online meeting spaces. This covers up to 75 users and comes with a public cloud and a standard support bundle.

The Genialcloud Proj enterprise bundle is available for up to 500 users, has a public cloud API, and has more storage space than the standard professional package. There is also priority support for enterprise bundle users, with dedicated support for up to 1000 users. It comes with a private cloud, with its own API, a metering and monitoring dashboard plus storage.

The final level of service is Enterprise +, which is an onsite, server installation with dedicated support to fully customize and manually coordinate the services provided by the ERP.
