

ENTERPRISEONE

EXTENDED PROFILE

OVERVIEW

Provided by ERP.BG, EnterpriseOne is a cloud ERP for organizations working in the manufacturing, distribution, and wholesale industries. It is most suitable for mid-size to large companies, particularly those that are geographically spread.

EnterpriseOne facilitates integration and data syncing across all departments, and helps manage documents and workflow sequences. Elsewhere, the package includes a basic CRM, financials, and a project management tool.

EnterpriseOne is cloud-based and delivered through a SaaS pricing model, meaning that it can be accessed through any device with an internet browser installed. This also means that the software is easy to update and flexible in pricing and functionality, with options to change the number of users and modules over time. Support is available online through a user account.
