ACCESS WEIGHSOFT EXTENDED PROFILE

access

OVERVIEW

Access Weighsoft is a modular waste management platform from The Access Group, built for UK businesses that run weighbridges, collect commercial waste, hire skips, or sell aggregates and concrete.

It originated as ISYS GateHOUSE, a data collection and waste management system. In 2014, ISYS merged with

Weighsoft Limited (a major competitor at the time. The Access Group then acquired the combined flagship platform in 2021 before rebranding it to Access Weighsoft.

The Weighsoft suite is embedded in Access's wider business software range (finance, HR, payroll and analytics), a departure from the smaller standalone waste management software UK operators often shortlist alongside it.

The system has three layers: Foundation (which every customer gets), industry modules picked to match the business, and optional back-office add-ons. Most of the operational detail is in the industry modules.

FOUNDATION:

- Weighsoft Core for day-to-day operational management
- Access Evo, a single sign-on workspace with an AI assistant (Copilot), a prioritised task feed and small operational apps
- Dashboards and reporting
- Regulatory compliance tools, including Digital Waste Tracking submissions
- Cloud hosting, training content and team collaboration tools

INDUSTRY MODULES:

- Weighbridge: Automatic weight capture from weighbridge hardware, tare management and multi-weighbridge sites (your own, a third party's or both)
- Skip Hire: Skip and roll-on roll-off (RoRo) bookings, deliveries and collections
- Trade Waste: Route-based commercial collections, contracts, driver app and on-board weighing
- Materials & Aggregates: Stock control and sales for quarries and recycled aggregates
- Ready-Mix Concrete: Concrete production and delivery
- Hazardous Waste: Consignment tracking and compliance for hazardous and industrial waste disposal

COMMERCIAL WASTE AND FIELD TOOLS

The trade waste module handles regular and ad-hoc contracts, round scheduling and route optimisation, then carries the job through to invoicing. Drivers use a mobile app for job lists, vehicle checks, photos, signatures and exception reports (contamination or a blocked bin, say), and those reports open a case in the back office automatically.

Bins can be tracked by RFID or barcode, and customers get a portal showing orders, job status, tickets and invoices. Billing can draw on on-board weighing data, so weight-based charging doesn't need manual entry.

COMPLIANCE

Weighsoft produces Environment Agency and SEPA returns, Duty of Care documents and waste reports, and Access claims validation against more than 650 EWC codes.

The Access Group says waste receiving sites in England and Wales must record receipts through the government's Digital Waste Tracking service from October 2026, with Scotland and Northern Ireland following in January 2027.

ADD-ONS

Finance (Access Financials, Access Expense, Lightyear), HR (Access People HR Evo), payroll (Paycircle or outsourced), and predictive analytics (Fathom) can be added from the same vendor. Weighsoft also connects to more than 20 third-

party finance packages.
