

VIEWPOINT

EXTENDED PROFILE

OVERVIEW

Viewpoint, now a subsidiary of Trimble, offers a construction management software suite that helps make projects more efficient and collaborative. Their tools are designed for everyone in the construction industry, from general contractors to housebuilders and developers.

KEY PRODUCTS AND FEATURES

- **Viewpoint for Projects:** A cloud-based document and information management system that centralizes project data, ensuring all team members access the most current information. It facilitates seamless collaboration and maintains a single source of truth for project documents.
- **Viewpoint Field View:** A mobile app that digitizes field processes, reducing reliance on paper-based systems. It enables on-site teams to capture data, manage tasks, and monitor real-time quality and safety inspections.
- **Trimble Connect:** A collaboration platform that integrates with Viewpoint solutions, allowing project stakeholders to share and access project information, including 3D models, enhancing Building Information Modelling (BIM) capabilities.

USE CASES

Viewpoint offers tailored solutions to meet the specific needs of various sectors within the construction industry, including:

- **General contractors:** Viewpoint provides tools that offer real-time insights into project parameters, helping general contractors reduce risks and increase profitability. Features include project management dashboards, document control, and BIM Level 2 compliance tools.
- **Housebuilders and developers:** The software addresses the unique challenges of fast-paced projects with multiple teams and budgets. It streamlines project management, enhances communication, and ensures compliance with regulations such as Part L.
- **Manufacturers:** Viewpoint's manufacturing management software supports the entire process from design to delivery. It provides management and sales teams with timely information, aids operations

and productivity management, and connects all team members to track orders throughout their lifecycle.

- **Modular construction firms:** For companies specializing in modular construction, Viewpoint offers solutions that manage projects from initial manufacturing to on-site installation. It connects teams and streamlines workflows with real-time data.
- **Infrastructure professionals:** Viewpoint's software simplifies large projects like road building and harbor upgrades. It enables teamwork across locations, secure cloud access, and efficient field management.
